MANAGER COPY

Grade from this sheet. It is printed separately from the test — keep it off the bar while anyone is being certified.

Section 1 is worth **36**, Section 2 **16**, for **52** written points. A bartender certifies at **47** plus three correct builds, each finished within **2:00** from called ticket to the rail.

SECTION 2

What gets sent back

16 POINTS

Two points each. Award the full two if they have the substance — the wording will not match.

- 1. Which drink on this menu is never shaken, and what happens if you shake it?**Scarlett Spritz. It is built in the glass. Shaking flattens the Prosecco.
- 2. Where does the Pernod go on a Green Goddess, and at what point in the build?**In the glass, not the tin. Rinse and dump the excess before you shake.
- 3. When is the soda added to a No New Friends, and why never in the tin?**After the shake, in the glass. Shaking soda kills the bubbles and can blow the tin apart.
- 4. Which drink is served up, and what does that mean for the glass?**Chai Hard. Chilled coupe, no ice in the glass.
- 5. In what order do the two LMF 2.0 garnishes go on, and why does it matter?**Dragonfruit powder first, then the calendula. Dusting over the flowers buries them.
- 6. Why do you strain over fresh ice instead of the ice you shook with?**Shaken ice is chipped and already melting; it waters the drink down in the glass.
- 7. Which drink has no fixed total pour, and why?**No New Friends. The soda tops the glass rather than being measured.
- 8. A guest orders a drink and you are out of the biz. What do you do?**Tell the guest it is unavailable and call it to the bar lead. Never substitute or free-pour a replacement.
